

Health Check Project Review

A **Modis Health Check** provides independent assurance and challenges the status quo. Our actionable recommendations enable you to optimise cost, mitigate risk and improve quality and performance.

Assess the current state and health of your project against its approved project plan by reviewing the progress made, delivery methodology, relevant architecture and design philosophies, quality compliance, the project organisation, governance framework and supporting project artefacts.

Identify any project risks and the containment or treatment plans required, stakeholder experiences and business expectations, capability gaps, and any deviation from best practices.

Recommend specific actions to turnaround project delivery performance, improve communication strategies for key stakeholders, frank commentary on project status, governance standards, and overall improvements to boost the capabilities of your project office.

WEEK 1+2

- Project review (for projects < six months duration)
- Supporting document review
- Six stakeholder interviews
- Three workshops

WEEK 3+4

- Develop recommendations
- Present findings.

Why engage Modis?

Every IT project is a business project. Therefore, a failed project will impact business performance, damage confidence, waste time and in most cases, result in serious cost blowout. No organisation can afford this. Modis has successfully delivered hundreds of projects, of all sizes, ranging from days to multi-year engagements.

We know what it takes to make a project succeed, such as, good governance, active leadership by engaged executives, and a skilled project team. Modis will bring its sought-after project management expertise and provide independent recommendations to assure project success.

About Modis

At Modis, we exist to connect people and businesses to the technology, solutions and opportunities they need to thrive in a rapidly advancing world.

We're here to help organisations and individuals collaborate, outperform and deliver better results than they ever could in isolation. In other words, to **#ConnectSmarter**
